

PROGRAM ASSESSMENT PLANNING FORM

Program to be assessed:

Title: Machine Tool Programming (CNC)
 Division: ATP Department: INTD Program Code: CTMTP

Type of Award: A.A. A.S. A.A.S.
 Cert. Adv. Cert. Post-Assoc. Cert. Cert. of Completion

Assessment plan:

Learning outcomes to be assessed	Assessment tool	When assessment will take place	Describe population to be assessed	Number of students to be assessed
Code for programming machine tool motion resulting in desired part features.	Capstone Project	Fall 2016	NCT 221	All
Troubleshoot, debug and edit programs to enhance productivity and part quality.	Capstone Project	Fall 2016	NCT 221	All
Model and post machine tool paths using CAD/CAM software,	Software Quiz	Fall 2016	NCT 123	All
Design and build mechanism to hold parts.	Capstone Project	Fall 2016	NCT 221	All

Scoring and analysis of assessment:

1. Indicate how the above assessment(s) will be scored and evaluated (e.g. departmentally developed rubric, external evaluation, other). Attach the rubric/scoring guide.

Outcomes 1 - 4 will be assessed using a departmentally-developed rubric.

2. Indicate the standard of success to be used for this assessment.

75% of the students will score 70% or better on each outcome.

3. Indicate who will score and analyze the data (data must be blind-scored).

PROGRAM PROPOSAL FORM

- Preliminary Approval** – Check here when using this form for preliminary approval of a program proposal, and respond to the items in general terms.
- Final Approval** – Check here when completing this form after the Vice President for Instruction has given preliminary approval to a program proposal. For final approval, complete information must be provided for each item.

<p>Program Features Program's purpose and its goals. Criteria for entry into the program, along with projected enrollment figures. Connection to other WCC programs, as well as accrediting agencies or professional organizations. Special features of the program.</p>	<p>Students in this program will demonstrate competence in writing, editing, troubleshooting, and debugging CNC (computerized machining) code for manufacturing parts. Students learn 3D modeling and application of CAD/CAM software to produce machine tool code for CNC machine tools. This certificate is linked to the Mechatronics Program as one of the specialty tracks.</p>	
<p>Need Need for the program with evidence to support the stated need.</p>	<p>Many of our students are only here to get specific training required by local industry. This is reflected in our completion numbers.</p> <p>Several students have asked for certification. Local employers would like the certification as an indication of the level of skill sets the potential employee has attained.</p> <p>We had eliminated the machine tool technology program from the Automation program (now Mechatronics).</p>	
<p>Program Outcomes/Assessment State the knowledge to be gained, skills to be learned, and attitudes to be developed by students in the program. Include assessment methods that will be used to determine the effectiveness of the program.</p>	<p><u>Outcomes</u></p> <ol style="list-style-type: none"> 1. <p>Program Description for Catalog and Web site</p>	<p>In this program, student will learn to write, read and edit programs for CNC machine tools. They will understand core canned cycles for milling and turning operations on CNC machine tools and have the skills to do 2D and 3D modeling and posting of CNC code using CAD/CAM software. Students completing this certificate will be able to create, edit and debug code for local manufacturing companies.</p>
