

DUO TOKEN VPN INSTRUCTIONS

1. Open Global Protect and click connect.
2. Sign in with your NET ID and your password followed by a comma and the six-digit code from your token.
3. Press the red button on the token and a six-digit code will display.
 - Do this after you have your password and comma entered since you only have about 10 seconds.
 - For example, Y0urP@55word, 123456
4. The log in screen will pop up again and this time you will log in with your NET ID and Password only.
5. Once you see the screen below, you know you are fully connected.
